

SOLANA MOBILE · CLOCK IN · OCTOBER 2026

RUGBUSTER

FOR ANDROID

Spot the creator dump before you buy.

A Solana token check that lives on your phone: share a token, get the verdict with proof, and an alert when the creator sells.

Fedja Furduj · Belgrade · rugbuster.io

On pump.fun, honest and dishonest tokens pass the same contract checks.

The launchpad template revokes mint and freeze authority for every token. Contract scanners call both clean.

The difference is not in the contract. It is in what the creator does with their own tokens, and that buy sits in the transaction that creates the token, visible before anyone else can buy.

02 · THE FINDING · 9,170 LAUNCHES, OUTCOMES READ FROM CHAIN

89%

of creators who bought 1%+ of their token sold all of it within the first hour.

2,785 of 9,170 creators bought 1%+ · 97.6% sold within 30 days · in 163 of 300 launches, 3+ wallets bought within 5 seconds of creation

A contract scanner said the creator holds 0%. RugBuster said DANGER.

CONTRACT SCANNER

0%

creator holds

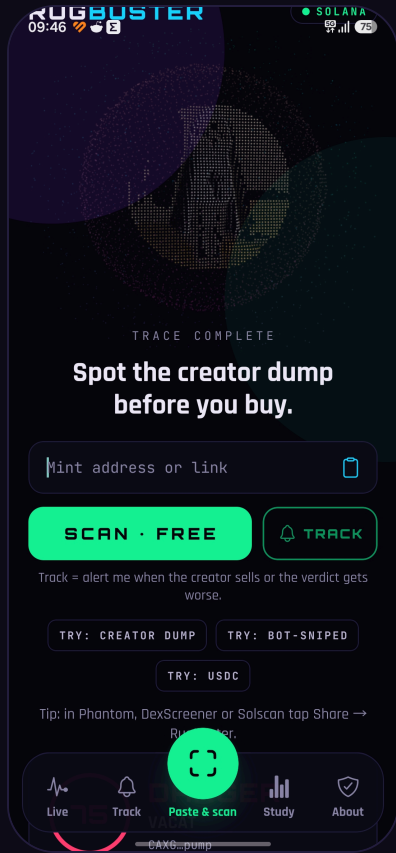

RUGBUSTER

35.5%

bought at creation, sold all of it 22 seconds later. Both transactions one tap away on Solscan.

The 0% was what was left after the exit.

Built for the phone, not wrapped from the web.

Share → RugBuster

From Phantom, DexScreener, Solscan or any browser. No copying addresses.

Track + alert

Re-checked in the background; your phone tells you when the creator sells or the verdict gets worse.

Mobile Wallet Adapter • x402

Pay \$0.01 USDC per scan from the wallet on your phone. A real transfer signed in Phantom; the facilitator pays the fee.

Live • proof links

What RugBuster sees across all users; every finding linked to its transaction.

The question a trader has is not "is this a scam". It is "will the creator dump on me".

BEFORE BUYING

Creator still holds 15%
bought at creation.
Nothing stops a sale.

WHILE HOLDING

"The creator of Moon
just sold their 15.1%." –
a notification, not a
page you have to
remember to open.

EVERY DAY

Live: what the
creators of today's
launches did, with the
reason on every row.

Of ten fresh tokens checked while writing this deck, two creators sold within the hour. Tracked, both would have been an alert.

SKR and Seeker Genesis Token holders get Pro.

Today

Connect the wallet once over Mobile Wallet Adapter. Any SKR, or a Seeker Genesis Token, unlocks unlimited tracked tokens with alerts. Nothing signed, nothing charged; read on chain.

Next

Pay per scan in SKR next to USDC. A free month of the full Pro plan for every Seeker owner. Publication on the Solana dApp Store.

The only other scanner on the dApp Store reads the contract. This one reads the creator, and it reads it first for the Seeker community.

Every answer says what it could not check.

- **Proof, not trust:** every finding links to the transaction behind it.
- **A gap is never shown as clean:** "Not checked" is listed on every scan.
- **Rules, not AI:** the verdict comes from named rules, gated by 17 on-chain-confirmed creator exits; a test fails if a rule changes without a version bump.
- **We publish our misses:** our old rules called 1,346 of 2,785 creator-dump tokens safe. Fixed on Sep 18, published with the data.
- **No money from token creators:** no badges, no paid verification.

Live product. Solo founder. Looking for the first wallet or trading bot.

Live now	Android app (this submission) · public API, free, no key · x402 pay-per-scan on Solana · Creator Trace web app · Chrome extension · Telegram bot
Scale	100,000+ tokens scanned since May 2026. No paying customer and no integration partner yet; the x402 payments so far are our own tests.
Built for this hackathon	The whole Android app, Oct 5-8: share-to-scan, tracking and alerts, MWA payments, Live, Pro for SKR / Seeker holders. Every commit in the repo.
Who	Fedja Furduj, Belgrade. 25 years in design and multimedia; got rugged as a beginner by a token a scanner called safe. Builds alone with AI coding agents, ships every week.
